

Dear Sirs,

I wanted to comment on your consideration about LPFM. Please do not give them priority over FM translators. Our family listens to a station called K-LOVE. It is a wholesome, positive and encouraging station, commercial free, that is listener supported. If you change things there is a great possibility that our family may no longer be able to listen to K-LOVE. We live in the RIM country of Arizona and have a difficult time picking up many radio stations but we have fought for this station because of the values it represents. I know my family will not hear anything inappropriate and it is a safe haven for our whole family. There is no other station like K-LOVE on the air and this will greatly affect thousands of families across this country. Our country's values are always under fire and to remove a station like KLOVE which stands for goodness and honesty and good morals is a disgrace and will only further push our society in a moral spiral downward. Please consider leaving things the way they are now!
